¹ **Note on billing by minutes for Charge Basic & Charge Pro tariffs:** Due to legal circumstances, SMATRICS is not allowed to bill by kWh at all charging stations, as some of the partner networks do not comply with calibration law ("stations without kWh billing"). At such **stations without kWh billing**, SMATRICS may only charge by the minute, namely the **prices of the Charge Time tariff**. All stations are marked accordingly on our [charging network map](#) and in the [mobile charging app](#). You can also find a list of the SMATRICS charging stations that are billed by the minute in our [charging station overview](#).

All information includes 20% VAT plus a one-time activation fee of 19.90 € for the SMATRICS charging card. Each SMATRICS charging card with the Charge Pro tariff is valid for one vehicle. Replacement card: 30.00 €; valid from 01/31/2023.

The performance information refers to the maximum power output of the charging point, regardless of the vehicle's power consumption.

The selected SMATRICS tariff is concluded for an indefinite period. Both contracting parties have the right to dissolve this contract by means of ordinary termination at the end of each month. The notice period is two weeks.
